– The MAILING DATE of this communication appears on the cover sheet with the correspondence address –  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM  
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If no period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: claims 1-16

Group I: a cutting blade, an insert that is removably attached to the rear portion of the mower deck; classified in class 56, subclass 17.4.

Group II: claims 17-20

Group II: a cutting blade, an insert attachable to the rear portion (note: not removably attached, and only requires to be capable of being attached) by at least one fastener adjacent to the exterior surface of the rear portion of the mower deck sidewall (note: not required to be on the exterior surface, adjacent is too broad for that); classified in class 56, subclass 320.2.

Group III: claims 21-24

Group III: a mulching blade, a mulch ramp, an insert removably attachable to the rear portion of the sidewall; classified in class 56, subclass 17.3.

Group IV: claims 31-34

Group IV: note: no cutting blade, nor mulching blade required by the claim; a discharge control device (note: does not require to be an insert, it can

be a remote control or other control device), at least one securing member having a portion that has a position outside of the cutting chamber (note: it is more specific to the portion being outside, unlike in Group II for the at least one fastener); classified in class 56, subclass 350.

Group V: claims 35-38

Group V: machine operable in a mulching mode and a discharge mode (note: the claim does not require a cutting/mulching blade), a plurality of wheels & power unit & at least one drive member (note: none of this required by any of Groups I-IV), a discharge control device (note: does not require to be an insert, it can be a remote control or other control device), at least one securing member having a portion that has a position outside of the cutting chamber (note: it is more specific to the portion being outside, unlike in Group II for the at least one fastener); classified in class 56, subclass 350.

The inventions are distinct, each from the other because of the following reasons:

Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01) (note see above different functions & elements). In the instant case the different inventions:

Groups I & II & III are each distinctly patentable from each other and from Groups IV or V as outlined above. Applicant is required to elect Group I (claims 1-16) or Group II (claims 17-20) or Group III (claims 21-24) or Groups IV & V (claims 31-38; it is noted that Groups IV & V are grouped together, because Groups V & IV are a combination and subcombination, respectively, however, the combination appear to contain all elements of the subcombination).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
